

RU Ready

The RU Ready Suite consists of a series of 30-60 minute-long courses that assist jobseekers with their job search. On completing a course, jobseekers receive a diagnostic printout that provides a snapshot of their preparation to-date and an action list that they should work through to improve their chances of getting a job.

These modules provide jobseekers with a greater understanding of where preparation is needed prior to an interview, including the importance of researching the position and company, being appropriately dressed and having the right attitude.

The RU Ready modules include 'RU Ready: Get Ready for your Interview' – and 'RU Ready – Interview Questions'.

Are your jobseekers interview ready? These short, effective and inexpensive tools highlight the preparation needed by individual jobseekers across a range of different interview situations.
